Description of Work:

The Canadian Space Agency CSA Space Utilization Directorate required consulting support to quantify and qualify the potential socioeconomic benefits to Canadians of satellite-derived information on water quality and quantity that will ultimately allow the identification of specific mission outcomes and applications gaps to guide future smartEarth investments. This will be done by using a value of information framework and other relevant methodologies based on international best practices, in order to assess the impact on decision-making for three water-related space-based EO missions: WaterSat, WildFireSat and Terrestrial Snow Mass Mission.

Inquiries

Inquiries regarding this RFP requirement must be submitted to the Contracting Authority named above. Request for Proposal (RFP) documents will be e-mailed directly from the Contracting Authority to the Qualified Supply Arrangement Holders who are being invited to bid on this requirement. BIDDERS ARE ADVISED THAT "BUYANDSELL.GC.CA" IS NOT RESPONSIBLE FOR THE DISTRIBUTION OF SOLICITATION DOCUMENTS. The Crown retains the right to negotiate with any supplier on any procurement. Documents may be submitted in either official language.

NOTE: TSPS is the mandatory method of supply for the provision of non-informatics professional services, both task and solutions based, at or above the North American Free Trade Agreement (NAFTA) threshold. This method of supply covers five core areas of expertise that are commonly and nationally used: human resources services; business consulting/change management; project management; real property project management services; and technical engineering and maintenance services.

For contact information please refer to PSPC's [Contact Acquisitions page](#).
